## About Us

VBS Engineering & Chemicals has been working since 2007, gaining immense industry expertise in the production of high-quality products such as Magnesium Chloride, Disodium Phosphate Anhydrous, Acrylic Resin Polymer, Magnesium Chloride Hexahydrate, Monosodium Phosphate etc. These are renowned for their superior performance and are repeatedly chosen by customers on the grounds of their right appearance, boiling point, density, melting point, molecular weight, and solubility in water. In addition to this, we have a subsidiary company that markets a variety of inorganic compounds. We are a supplier, trader, manufacturer and exporter of a variety of chemicals that are renowned for their superior quality, compositional precision, and longer shelf life. Our products are used in a variety of sectors, including those that produce fertilizers, pharmaceuticals, petrochemicals, dyes, and construction and chemical products.

We have cutting-edge facilities that are backed by a staff of devoted and committed experts with a wealth of domain knowledge. Our sister company is run by employees, who are excellent in efficient marketing strategies, guaranteeing a great reaction from potential customers. We have an advanced quality control department that makes sure our range meets industry requirements for quality. A distinct group of research and development specialists work for our organization and remains engaged in trend analysis and market research.

We have carved out a top position for our company in our industry because of the skillful leadership of our mentor, Mr. Pradeesh Unni. His in-depth expertise and broad industry experience have enabled us to successfully attract a sizable clientele on the national market.

## Quality Assurance

In order to keep the confidence and goodwill of our respected clients, we believe in offering them the highest quality Disodium Phosphate Anhydrous, Acrylic Resin Polymer and similar products. Our whole range is subjected to rigorous quality inspections by our staff of quality controllers, who work diligently to uphold international quality standards.

Similar to how our sister company does, we have a team of quality control chemical engineers that do thorough quality inspections on a wide range of inorganic chemicals to ensure that they meet industry requirements. We use various quality control methods to provide the highest quality products to our customers.

# Our Products

**Magesium Chloride**

**Magnesium Chloride  
Hexahydrate**

**Monosodium Phosphate**

**Disodium Phosphate  
Anhydrous**

**Disodium Phosphate Crystal**

**Ammonium Dihydrogen  
Phosphate**

**Mono Potassium Phosphate**

**Mono Sodium Phosphate  
Technical Grade**

**Monosodium Phosphate  
Crystal**

**Sodium Acid Pyrophosphate**

**Di Potassium Hydrogen  
Orthophosphate**

**Anhydrous Trisodium  
Phosphate**
